AC1 Â· reviews received as host, organised activity/invite-wise (rater, rating, comment, related activity/invite, date). New Reviews tab + Average-rating stat. AC3 Â· per-row Remove.

Filter (Sheet & reused)

Filter reviews

Events (activity / invite)

From date

To date

Review text

Reset

Apply

AC2 & filter by Events (the activity/invite), date, and Review; reuses the ActivityFilterDrawer pattern.

Dialog & ConfirmDialog (destructive)

**Remove this review?**

It will be removed from the session detail page and the host's profile Reviews tab, and excluded from the host's average rating. This can't be undone.

Cancel

Remove

AC3,4,5 & removal pulls it from all public lists, recalculates the average immediately, and blocks the rater from re-rating that session.

Edge state

**Riya M.**

Average rating » hidden (no ratings)

No reviews

AC6 » removing the last review returns the average to the hidden state (recalculated); the Reviews tab stays with its empty state.
